Dear Hiring Manager,

I am writing to express my interest in the [Position] role at [Company]. With over three years of experience in data analytics, master data management, and internal tooling, I have a consistent track record of translating messy business processes into automated, reliable workflows that teams actually use.

In my current role at Thrasio, I redesigned the SKU creation and update workflow as a Streamlit web application, cutting the average processing SLA from 24 hours to 30 minutes — a 95% reduction. The tool handles Google OAuth authentication, multi-step data validation, NetSuite integration, and automated email notifications, replacing a fragmented manual spreadsheet process. Prior to that, at Norsat International, I built Power BI dashboards for the purchasing team that reduced report refresh time by 50% and contributed to approximately \$70,000 in annual cost savings by correcting KPI calculation errors across presale and supply chain reports.

I am particularly drawn to [Company] because [specific reason]. My background in [MDM / BI / automation] and hands-on experience with Python, GCP, SQL, and Power BI positions me well to contribute to your team from day one. I thrive in cross-functional environments where I can bridge the gap between business requirements and technical implementation.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience can support [Company]'s goals. I am available for an interview at your convenience.

Sincerely,

**Sean Yang**
